BTEC LEVEL 2 DIPLOMA IN ENGINEERING

Start your engineering career path with an internationally recognized high school completion diploma awarded by Pearson, the world's largest learning company.

A BTEC Level 2 Diploma in Engineering is designed to equip young learners with the knowledge necessary to understand the basics of engineering and is **broadly equivalent to four IGCSE's**.

Young learners aged 16 and above or mature learners with no professional qualifications can study a Level 2 diploma and equip themselves with practical skills in the field of Engineering.

CAREER PROGRESSION

ENTRY REQUIREMENTS

- Evidence of numeracy and literacy skills in last studied high school report with some experience of Math & Physics.
- Work experience demonstrated through updated resume (for working professionals) in an IT/Engineering or related field.
- Additional English language proficiency may apply where medium of teaching is not English.
